

Here are some of the top Android apps of the year 2010-2011 that you can explore in the Android market:

2010

Wave Secure

This is a marvelous security app for your Android phone, and you can carry out a bunch of tasks with it. You can back up all your data (contacts, photos, multimedia files and text messages) on the 'Cloud' and then you can retrieve this at any other time, on any of the other top 10 Android phones. You can also track the phone via GPS if it is stolen, lock it from a remote location and also get a mobile tracker feature.

SMS Commander

This is another example of the top rated Android apps that carries out various security features. From a remote location you can just send an SMS to the phone and then carry out various activities like lock the phone, get the phone's location, get battery information, turn the ringer volume up and also set up automatic texting and calling.

Camera Zoom FX

The camera interface and settings on Android phones are not great, and this paid app helps you get some additional benefits. It allows you to add 40 different scenes to the picture, it lets you geotag your pictures, it lets you carry out social network integration, and many other kinds of features as well. All these qualities make this one of the best paid Android apps around.

2011

UpSoundDown

This is one of the best Android apps 2011 that was earlier solely restricted to Samsung mobile phones. Today any Android app can make use of this simplistic, yet highly useful feature. If you are on an active call you just need to place the phone on a table upside down, and the call will automatically switch over to loudspeaker mode. This is a very useful tool to have, and it makes full use of the accelerometer that is present in every touchscreen phone around.

Springle

This is a paid Android app, and it gives you the ability to create some psychedelic graphics and visuals. We have all seen some stunning visuals that come embedded with various media and music players, and with the help of this app you can create some yourself. With the simple touch of a finger, you can decide which colors appear on the screen, what patterns they take up and how they explode in front of your eyes. Here are some more of the best paid Android apps.

ES File Explorer

This is one more of the best free Android apps 2011 that you should possess. It is one of the many file managers available for Android phones, and it has the added feature of managing files that are copied from your PC wirelessly. You can set up a Wi-Fi connection with the PC, and then copy files, rename them and move them around on your phone, all without connecting the phone to the PC with a microUSB cable.
